PROFESSIONAL SUMMARY

Data Analyst Intern and Computer Science graduate with hands-on experience in data cleaning, exploratory data analysis, feature engineering, KPI analysis, dashboard development, and data visualization. Proficient in SQL, Python, Pandas, Power BI, Advanced Excel, and Tableau, with experience analyzing 261K+ time-series records and building interactive analytics solutions using Streamlit and business intelligence tools.

TECHNICAL SKILLS

Programming & Data Analysis : Python, Pandas, NumPy, Data Cleaning, Data Transformation, Exploratory Data Analysis, Feature Engineering

Databases : SQL, MySQL

Business Intelligence & Visualization : Power BI, Tableau, Power Query, Matplotlib, Seaborn, Streamlit

Spreadsheet Analytics : Advanced Excel

Developer Tools & IDEs : Git, GitHub, VS Code, Anaconda, Jupyter Notebook, Git Bash, Antigravity IDE

AI Tools : ChatGPT, Claude AI, Antigravity

EXPERIENCE

Unified Mentor Pvt. Ltd.

May 2026 – Present

Data Analyst Intern

Gurugram, Haryana

- **Analyzed 261K+ ferry ticket sales and redemption records** spanning 2015 – 2025 to evaluate passenger demand, travel patterns, and operational trends for Toronto Island Park ferry services.
- Cleaned and transformed time-series data using Python and Pandas, **performing datetime processing, feature engineering, and exploratory analysis** across hourly, daily, weekly, and seasonal demand patterns.
- Analyzed ticket sales, redemptions, net passenger movement, peak demand windows, and rolling averages to identify demand patterns relevant to ferry scheduling and operational planning.
- Built an interactive **Streamlit analytics dashboard** featuring KPI cards, time-series visualizations, date and time filters, and peak versus off-peak demand comparisons for exploratory operational analysis.

Celebal Technologies

April 2024 – June 2024

Front-End Developer Intern

Noida, Uttar Pradesh

- Developed 10+ responsive and mobile-friendly web pages using **HTML5, CSS3, and JavaScript** while contributing to a live web project and following modern UI/UX standards.
- Optimized CSS structure and refactored JavaScript code, improving **page load performance by 25%**
- Collaborated in an **Agile development environment**, participated in sprint reviews, and used **Git for version control** and team-based development.

PROJECTS

Cab Booking System | GitHub

Tech Stack: SQL, MySQL

- Designed a **normalized MySQL database schema** for a cab booking system to organize customer, driver, booking, payment, and ride-related data efficiently.
- Developed SQL queries using joins, subqueries, aggregations, views, and stored procedures to analyze booking activity and retrieve business-relevant information.
- Applied **indexing and role-based access control** concepts to improve query efficiency and manage secure access to customer and driver data.

D-Mart Sales Analysis | GitHub

Tech Stack: Power BI, DAX

- Developed an **interactive Power BI dashboard** to analyze revenue, profit margins, customer segments, and product-level sales performance through business-focused KPIs and visualizations.
- Created **DAX measures** for year-over-year growth, cumulative sales, and performance tracking to support comparative and trend-based analysis.
- Analyzed product-level sales contribution and identified top-performing products and sales patterns to support inventory and business performance analysis.

Coffee Shop Revenue & Store Performance Analysis | GitHub

Tech Stack: Microsoft Excel

- Analyzed transaction-level coffee shop sales data to evaluate revenue trends, store performance, product category contribution, and weekday sales patterns.
- Examined sales performance across time periods and hourly transaction activity to identify peak business hours and recurring sales patterns.
- Built an interactive Excel dashboard using **PivotTables, PivotCharts, formulas, and slicers** to present KPIs and enable performance analysis across store locations, product categories, and time periods.

Automobile Data Analysis | GitHub

Tech Stack: Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook

- Cleaned and preprocessed an automobile dataset containing 205 records and 15 vehicle attributes by handling missing values, converting data types, applying median imputation, and validating duplicate and categorical records.
- Performed exploratory and statistical analysis to examine vehicle pricing, fuel efficiency, engine performance, body styles, and brand-level trends, identifying relationships between vehicle characteristics and price.
- Created business-focused visualizations using Matplotlib and Seaborn, including correlation heatmaps, bar charts, and regression-based scatter plots, to communicate pricing and performance patterns.

EDUCATION

Noida Institute of Engineering and Technology

Nov 2021 – June 2025

Bachelor of Technology in Computer Science and Engineering

Greater Noida, Uttar Pradesh

- **Relevant Coursework:** Data Structures and Algorithms, Database Management Systems (DBMS), Operating Systems, Computer Networks, Software Engineering

IT Vedant

Dec 2025 – Dec 2026

Masters in Data Science & Analytics with Artificial Intelligence

Lucknow, Uttar Pradesh

- **Relevant Coursework:** Data Analysis, SQL for Data Management, Advanced Excel, Power BI and Data Visualization, Python for Data Science, Machine Learning, Statistics for Data Analytics

CERTIFICATIONS

Professional Certifications | GitHub

- | | |
|---|----------|
| • SQL Mastery — IT Vedant | Feb 2026 |
| • Power BI Essentials — IT Vedant | May 2026 |
| • Advanced Excel — IT Vedant | Jun 2026 |
| • Tableau Essentials — IT Vedant | Mar 2026 |
| • Python for Data Science, AI & Development — IBM via Coursera | May 2022 |
